PREFACE AND ACKNOWLEDGEMENTS

The report provides information on the Construction activities in 2020. The information was gathered from establishments engaged in the Construction activities. These activities include general construction and specialized construction activities for buildings and civil engineering works. It includes new work, repair, additions and alterations, the erection of prefabricated buildings or structures on the site and also construction of a temporary nature and repair of buildings and engineering works, however, excludes information on Construction activities in the informal sector.

The important numbers presented are the macroeconomic aggregates such as Gross Output, Intermediate Consumption, Value Added, Compensation of Employees, Consumption of Fixed Capital and Operating Surplus. These aggregates are combined with similar information on other industries to provide an estimate of Gross Domestic Product, which is a measure of our economy's size. Information made available in this report will allow us to work out the industry's contribution to the economy. Information contained in this report constitutes inputs to a national accounts system which basically provides a quantitative image of the whole economy.

Information on the Construction industry would be useful to a good number of users, for instance the;

- 1) Economist who needs to analyze the supply and demand in the industry.
- 2) Planner who uses the data to forecast the economy's performance.
- 3) Investor who wishes to have a closer look at opportunities available in the Construction industry.

The cooperation of those businesses who supplied the information presented in this report is hereby acknowledged. The Fiji Bureau of Statistics will continue to seek their support as we need to continually provide reliable statistics for evidence based planning. The department would also like to thank the staff who were engaged in the conduct of the survey and the preparation of this report.

Maria Musudroka [Ms]

Chief Executive

1 INTRODUCTION

1.1 History of Surveys Undertaken

This report contains the results of the Enterprise Survey carried out for Construction for 2020 (refer to 2.2 on Coverage and Scope) together with other relevant information on the construction industry.

Similar surveys done previously were known as the Census of Building and Construction. The first one conducted by the Fiji Bureau of Statistics (FBoS) was carried out as part of the 1968 Census of Industries, which due to disparities revealed with other information then available, was not published. Census of Building and Construction for the first time was done for 1970 as an entity in itself. This was followed by the census conducted for 1971 and then the census conducted for 1973. The census was not conducted for years 1972, 1974 and 1975, but from 1976 it became a regular annual survey.

1.2 Need for statistics relating to Construction

Construction activities account for a substantial proportion of the total economic activity, whether in terms of the sector to the Gross Domestic Product (GDP) or in terms of its share of total employment and Gross Fixed Capital Formation (GFCF).

Statistics on construction are therefore needed for the preparation of national accounts so that a meaningful study of the whole economy can be made. The data can also be used to construct the input-output table that shows the inter-connection of the building and construction industry with other industries. Policy makers, too, require the data for formulating sound economic and social policies that augment capital formation. Finally, the data helps assess the importance and efficiency of the industry and this in turn helps the enterprises engaged in the building and construction industry plan and operate their business effectively.

1.3 Peculiar features of the Construction industry

The construction industry is notoriously volatile and it is also an industry for which it is difficult to get accurate and timely information.

- Construction activity is extremely mobile, the main activity being at a construction site.
- It is highly sensitive to weather.
- A large part of its production is "made to measure" which makes the product differ in type and size with different costs and prices because of differing circumstances at different locations.
- The period of construction is relatively long.
- The activity is carried out by a wide variety of units small and large private enterprises, public sector, own account individuals and other units whose main activities are in other industries.
- Subcontracting is prevalent.
- Many small enterprises go in and out of business with changing economic and seasonal factors.
- The activity involves the creation of fixed assets or the repair and maintenance of fixed assets.

2 METHODOLOGY

2.1 Legal Basis

The survey was conducted under the provisions of the Statistics Act (Cap 71). This Act protects the confidentiality of the information submitted by the establishments and stipulates the completion of the questionnaire as well.

2.2 Coverage and Scope

The 2020 survey covered all enterprises operating in the construction industry defined by the Fiji Standard Industrial Classification (FSIC) 2010 Section F. It is nevertheless possible that some small units not employing regular paid workers may have been omitted due to difficulties in identifying them, but the nature of such units do not affect the overall results in any significant way.

The businesses engaged in the construction industry covered in the survey were general building and special trade contractors e.g. electricians, plumbers, painters, civil engineers, earthmoving contractors etc (refer to FSIC 2010 for more details). Construction activities undertaken by the Central Government Ministries and Departments e.g. the Public Works Department fell outside the scope of this survey since they fall under the scope of the Survey carried out for the General Government, results of which are contained in the report titled An Economic and Functional Classification of General Government Accounts.

2.3 Statistical Unit

The unit of reporting was the enterprise. In cases where enterprises operated more than one type of business, efforts were made to obtain accounts for each activity. Where this was not feasible, the enterprise was classified according to the type of activity that brought in the most revenue.

2.4 The Frame

The frame utilised to survey the enterprises engaged in the construction activity in 2020 was the list of enterprises maintained by the FBoS. This list is known as the Business Register (BR), which is kept updated on the basis of information supplied to the FBoS by the Fiji Revenue and Customs Service, Registrar of Companies and the City and Town Councils. In 2020, there were 541 establishments recorded compared to 468 establishments surveyed in 2019.

2.5 Questionnaire Design

A common questionnaire was used for both the general building contractors and the special trade contractors. It called for information on the particulars of the enterprise e.g. type of organisation, income, expenditure, stocks and employment. Not all the data collected are published here (refer to Appendix X for Sample Questionnaire).

2.6 Data Collection and Survey Procedures

The questionnaires were emailed on 30th June, 2020 and replies were required within a month. Response by the due date was low, therefore personal visits to obtain the questionnaires were made to those enterprises that did not respond in spite of the reminders and to those enterprises that required assistance in filling out the questionnaires.

Once the questionnaires were received in the office, scrutiny and editing of data contained in them followed. Errors and omissions if found, called for more correspondence, telephone calls or personal visits in an attempt to obtain complete and correctly filled up returns, which were then placed in files sorted by activity and passed on for data entry.

On completion of data entry, tables were run, data edited and analysed and reports written.

2.7 Data Processing

Data was processed by FBoS' Economic Statistics Division using Microsoft Excel.

2.8 Reference Period

The enterprises contacted were to submit details for the calendar year 2020. Where the accounting year differed from the calendar year, enterprises were asked to provide information for the accounting year that covered the major part of the calendar year 2020.

2.9 Non-responding Enterprises

Enterprises that did not respond and enterprises that operated during the whole or part of the survey reference period but became untraceable during the survey enumeration period due to closure or removals were taken as non-respondents. To account for the operations of the non-responding enterprises, data was rated-up.

2.10 Rate-up Factors

Data of non-responding enterprises were calculated using rate-up factors. The rate-up factors were derived by first sorting out enterprises into types of business and then grouping these establishments into 6 "number of persons engaged" size groups of 1-4; 5-9; 10-19; 20-49; 50-99 and 100+. Using number of persons engaged in each of this group, simple arithmetic means of Value Added were obtained. These arithmetic means were then multiplied by number of persons engaged in each of the non-responding group to estimate their data. The estimated figures for the non-responding units were then added to the figures of the responding units to arrive at the <u>estimated</u> data of the entire construction industry.

The GFCF too has been estimated for non-response. Generally capital formations in small enterprises, like the ones who have not responded in our inquiry, are low.

Empirically,

Let n_{ij} be the number of employees in group i of the j establishment of those sampled and let g_{ij} be its corresponding parameter; i = 1 to 6; j = 1 to s, where s is all sample. Then estimate,

$$\hat{G}_{(i)} = \underbrace{ \begin{array}{c} \sum\limits_{i=1}^{6} \sum\limits_{j=1}^{k} g_{ij} \\ \\ \widehat{G}_{(i)} = \underbrace{ \begin{array}{c} \sum\limits_{i=1}^{6} \sum\limits_{j=1}^{k} n_{ij} \\ \\ \\ \sum\limits_{i=1}^{6} \sum\limits_{j=1}^{k} n_{ij} \end{array}}_{i=1} \underbrace{ \begin{array}{c} \sum\limits_{j=1}^{6} \sum\limits_{j=k+1}^{k} n_{ij} \\ \\ \\ \sum\limits_{i=1}^{6} \sum\limits_{j=1}^{k} n_{ij} \end{array}}_{i=1} \underbrace{ \begin{array}{c} \sum\limits_{j=1}^{6} \sum\limits_{j=k+1}^{k} n_{ij} \\ \\ \\ \end{array} }_{i=1}$$

where k = number responded

I = number not responded (which is s-k)

3 RESULTS

All data contained in this report are in Fiji Dollars and in current prices.

All tables in this report contain data inclusive of estimates for non-response; exceptions are tables 1A, 2 to 5B, 8 and 9 that contain actual survey data.

Results of sub-class [42001/42002] and [43291/43901] have been grouped together in order to protect the confidentiality of the information supplied by businesses.

NUMBER OF PERSONS					
ENGAGED		7,573	6,056		-20.0

The decrease in VA is mainly due to continuous decrease in turnover, expenses for the running of the business and less ongoing project works carried out around the country.

For supplementary information on the Construction sector reference can be made to Appendix I for the Concepts and Definitions, Appendix II for the Composition of the Macroeconomic Aggregates, Appendix III for the Building Permits Issued, Appendix IV for the Completion Certificates Issued, Appendix V for the Quarterly Building and Construction Value of Work Putin-Place, Appendix VI for the Building Material Price Index, Appendix VII for the Macroeconomic Aggregates 1970 – 2020, Appendix VIII for Major Events of the Industries, Appendix IX for the Gross Output compared with the Value of Work Put-in-Place and Appendix X for the Sample Questionnaire.

APPENDIX I: CONCEPTS AND DEFINITIONS

All concepts and definitions used in this report are based upon the recommendations of the United Nations for their world programme on Construction Statistics. The major concepts and definitions and their treatment are briefly explained below.

Compensation of Employees

Includes payments, whether in cash or in kind, made by the employer during the inquiry period for the work done to all persons included in the count of employees. It includes all cash payments, commissions, bonuses, cost of living allowances and wages paid during periods of vacation and sick leave, contributions in respect of their employee's social security and pension and payments in kind.

Consumption of Fixed Capital

In theory this is the value of the current replacement cost of fixed assets used up during the accounting period as a result of normal wear and tear. The consumption of fixed capital shown in this report is derived from the information supplied by the firm. This is expected to conform largely to the requirements of Income Tax Act.

Employment Size Group

This includes paid employment as well as people engaged.

Enterprise

An enterprise is ideally an economic unit which engages under single ownership or control, in one, or predominantly one kind of economic activity but may have different locations

Fixed Assets

Fixed assets include the value of all physical assets expected to have a productive life of more than one year and intended for use by the establishment. Included are major additions, alterations and improvements to existing fixed assets that extend their normal economic life or raise their productivity.

Foreign Owned

Subsidiary of an overseas company is always considered foreign owned, whereas a branch of an overseas company is only considered foreign owned if 51 percent or more of its equity is held abroad.

General Government

This includes the Central Government and the Local Government.

Gross Fixed Capital Formation

This is the outlay of the construction industry on new and second-hand durable goods less their sales plus their own account capital construction work done on similar goods.

Gross Output

Gross output is defined as gross value of all goods and services produced during the accounting period. These include the value of work completed during the year, gross margin on resale goods, the value of capital construction for own account and other income.

Intermediate Consumption

Intermediate consumption consists of non-durable goods and services, which are used up, in the production process. In principle non-durable goods are those goods, which have an expected lifetime of use of less than one year, or less than the accounting period. Compensation of employees does not form part of

intermediate consumption, but expenditure such as travelling expenses of management personnel are included. Intermediate consumption differs from total purchases of raw materials, fuels etc. by the amount of stock changes of such goods. Valuation of intermediate consumption is at purchasers' value i.e. it is inclusive of all costs incurred by producers in the acquisition of the required goods and services.

Local Owned

All companies with 51 percent or more of its equity held in Fiji are considered locally owned.

Number of Employees

This includes all persons who work in the establishment and receive regular pay and persons working away from the establishment when paid by and under the control of the enterprise. Also included are salaried managers, and directors of incorporated businesses except when paid solely for their attendance at board of directors meetings.

Operating Surplus

This is the excess of value added by producers over compensation of employees, consumption of fixed capital and net indirect taxes.

Payments in kind

This is defined as the net cost to the employer of those goods and services furnished to employees free of charge or at markedly reduced cost that are clearly and primarily of benefit to the employees as consumers. The item includes food, beverages, clothing (except uniforms for civilians as these are not worn off-duty) and lodging etc.

Private Sector

This includes, other than work done for the General Government, work done on residential buildings, hotels, schools etc owners of which is not the General Government.

Statistical Unit

Statistical unit is the Unit for which information is collected.

Unpaid Family Workers

Unpaid family workers are persons living in the household of any of the proprietors of the owning enterprise and working in the enterprise without regular pay for at least one third of the working time normal to the enterprise.

Value Added

Value added is the difference between the gross output and the intermediate consumption. It provides a useful way of measuring without duplication the economic importance of an industry or industrial sector.

Value of work put-in-place

The value of work put-in-place can be defined as the total value of work completed adjusted for work-in progress (work-in-progress at the end of the period surveyed minus the work-in-progress at the beginning of the period surveyed) for the period being surveyed. The value of work completed is calculated using information on expenditure that an enterprise incurs. The types of expenses include cost of materials, payments made in respect of fuel, electricity and water, transport and wages and salaries paid etc.

Working Proprietors

Working proprietors are owners of enterprises who are actively engaged in the work of the enterprise. Excluded are silent or inactive partners.

Notes: [1] Other buildings include factories, shops, restaurants, offices, warehouses, institutional dwellings such as hostels boarding houses, hotels, etc.

Source: Monthly statements submitted by the City and Town Councils and the Rural Local Authorities.

^[2] Additions refer to all work involving increase in existing floor area.

^[3] NO. refers to number of permits issued and not number of dwelling units.

^{*}Higher value recorded is due to the permit issued for commercial buildings, hotels and dwellings.

APPENDIX VIII: MAJOR EVENTS OF THE INDUSTRIES

GRAPH 1: VALUE ADDED 2010 - 2020 [FJD-Millions]

Some major projects completed during the period 1976 – 2020:

Note: Prior to 1995 very little documentation is available on the reasons for increases and decreases in the VA.

- The Fiji Hydro Scheme Monasavu Project took off in May 1978 and was completed in February 1981.
- In May 1987 Coup-de-tat as staged due to which the building and construction industry suffered immensely. It started picking up in 1990 around which time due to the deregulation of the economy that began in the latter half of 1988, factories, mostly for garment production started being constructed.
- 1992 and 1993 were favourable years for the building and construction industry. The Australian Embassy, the Parliament House, CWM complex, Air Pacific and Civil Aviation Authority Complex of Fiji plus other major Private Sector construction work was done.
- In 1994 the only major project was the one that was done for the Housing Authority.
- In 1995 the Fiji National Provident Fund project got off the ground. This continued into 1996, however unlike 1995 when mostly civil engineering work was done, the building works were done in 1996.
- In 1997 the major projects undertaken were the upgrading of Kings Road (Suva to Nausori),
 Nabouwalu Road (Naravuka to Dreketi), Buca Bay Road in Savusavu, Wainibokasi Road,
 Nasalia Road and Ratu Dovi Road. Also contributing to the growth were the earthmoving
 works done for the construction of the Sigatoka bridge and also the Delainavesi bridge.

- The decline in the value added in 1998 is due to the unusual increase in 1997. 1997 was an exceptionally good year for the industry. Most of the projects undertaken in 1997 were completed in 1997 and in 1998 no major projects were undertaken.
- Despite the political coup that took place in 2000, the value added increased. This is because some of the major projects that began in 1999 e.g. the construction of new kings road, two major hotels and private and public hospitals. The impact of the coup that was staged in 2000 was felt in 2001 as not many projects got off the ground and as such a decline in the VA.
- Increase in VA in 2002 was due to the Hotels being constructed on Denarau.
- Constructions of hotels that began in 2002 continued into 2004. Also in 2004 construction
 work on the new Rewa Bridge, the Fiji School of Medicine and the Lautoka Teachers College
 began.
- Some of the major projects that contributed towards an increase in VA in 2005 were the Great Council of Chiefs Complex, the Fiji National Provident Fund Building, Morris Hedstrom City Centre and Port Denarau.
- The increase in VA in 2006 was due to the carry forward of construction work from 2005 and also due to a few new projects undertaken.
- The decrease in 2007 is due to the political climate prevailing in the country which led to the holdback and withdrawals of some construction work in 2007.
- The increase of VA in 2008 is mainly due to the carry forward and completion of construction work that was held back in 2007.
- Most of the major projects were completed in 2009 as resulted in decrease in VA.
- The increase in VA in 2010 is mainly due to the civil engineering work carried out for the construction of FEA Dam in Nadarivatu.
- The increase in VA for 2012 is mainly due to ongoing projects and civil engineering works carried out for repair and upgrading of roads around the country.
- The increase in VA for 2013, 2014 and 2015 is mainly due to some ongoing project and new project and also civil engineering works carried out for repairing and upgrading of roads around the country.
- The increase in VA for 2016-2019 is mainly due to some ongoing project and new projects also civil engineering works carried out for repairing of commercial building, schools, residential houses and upgrading of roads and bridges around the country that was badly damaged by Cyclone Winston.
- The decrease in VA for 2020 is mainly due to decline in turnover and expenses from the construction businesses and ongoing project works carried out due to COVID- 19 pandemic. Imposed lockdowns and restrictions disrupted the construction industry as result businesses had to hold back and withdraw majority of the construction work in 2020. This further led to delays in payments, decrease in work rate and an increase in the cost of the materials.

APPENDIX IX: GROSS OUTPUT COMPARED WITH THE VALUE OF WORK PUT-IN-PLACE

CONFIDENTIAL DESPATCHED: __/__/_

2020 CENSUS OF CONSTRUCTION Tax Identification Number Please correct any errors appearing in this label

Dear Sir/Madam,

Enclosed is a copy of the 2020 Census of Construction questionnaire.

<u>COVERAGE AND SCOPE</u>: It covers all establishments engaged in Construction Sector classified under the Fiji Standard Industrial Classification 2010, Section F (refer note on page 2). If an establishment's Construction Activities are combined with other types of business, you should report on Construction Activities side of the operations only.

<u>PURPOSE</u>: The census provides an important means of assessing the composition this sector makes to the economy of Fiji, and indicates the changing composition and structure of the industry. The results of the Survey are used by the Fiji Bureau of Statistics to estimate the National Income of Fiji and in the provision of other key indicators.

<u>REFERENCE PERIOD</u>: A Reference period is the calendar year. If your accounting year is different provide information approximating closest to the calendar year. Limited liability companies are requested to submit a copy of their financial statements with the questionnaire.

<u>COMPULSORY REQUIREMENT</u>: The Census is conducted under the provisions of the Statistics Act 1961 (Cap 71). In accordance with Section 8 subsection 2 of this Act you are required to fill the questionnaire and return it to the undersigned. Please be advised that failure to meet the above deadline may lead to legal action.

<u>CONFIDENTIALITY OF INFORMATION</u>: Information supplied will be used by the Department for the preparation of statistics. Any release of information will be in accordance with the Statistics Act and only authorised persons will have access to individual information.

<u>CONTACT PERSON FOR HELP AND ADVICE</u>: Mr. Jashneel Prasad on email jprasad@statsfiji.gov.fj or telephone 331 5822 (ext. 386 242) or direct line 323 0842.

Maria Musudroka [Ms]
Acting Chief Executive

NOTE: Under the Fiji Standard Industrial Classification 2010, Section F Construction includes all units mainly engaged in constructing buildings, including the on-site assembly and erection of prefabricated buildings. Also included are:

- Construction of roads; railroads; aerodromes; irrigation projects; harbour or river works; water, gas, sewerage or storm-water drains or mains; electricity or other transmission lines or towers; pipelines or other specified civil engineering projects.
- Units engaged in the repair of buildings or other structures, as are those engaged in the alteration or renovation of buildings, preparation of mine sites, demolition or excavation.
- Units mainly engaged in certain specified installation activities such as the installation of heating and air conditioning equipment, the on-site assembly of boilers, the installation of fire alarm systems, the installation of blinds and awnings, the installation of petrol bowsers or the installation of electrical wiring.
- Units mainly engaged in providing special building or construction trade services such as structural sheet erection, carpentry, bricklaying, concreting, plumbing, painting, plastering, floor and wall tiling or roof tiling and the installation or laying of floor coverings such as carpets or linoleum.
- This return is required for the addressed establishment only. In case this is not possible, a combined return with similar main activities may be submitted. If the information cannot be provided on this basis, please state provide an explanatory note.

ORGANISATIONAL STRUCTURE

A business can have more than one establishment involved in similar or different activities at different locations. State the location and the type of activity the establishment is engaged during the year.

FORM OF OWNERSHIP

- 5 (1) Fiji owned: This is an enterprise operating in Fiji in which 51% or more equity is held locally.
 - (2) Branch of an overseas company: This is an enterprise operating in Fiji which is controlled by or supervised by an overseas head office and which is an integral part of the foreign parent organisation. Branch has no equity share capital.
 - (3) Subsidiary of an overseas company: A company is a subsidiary of another if that other company owns this subsidiary wholly or holds more than half the nominal value of the equity share capital of this subsidiary company.

EQUITY PARTICIPATION

Give the proportion of the share capital held by residents of Fiji. Equity share capital held by companies or individuals on behalf of residents of Fiji should also be included.

OPERATING STATUS

If you are no longer in business, a **STATUTORY DECLARATION** must be attached with the questionnaire with the words "**CLOSED BUSINESS**" written across the questionnaire and returned to the Fiji Bureau of Statistics. The Statutory Declaration must be signed by a Magistrate or a Barrister/Solicitor, Justice of Peace or a member of the Notary Public acting on your behalf. The Statutory Declaration must state the name of the business, nature of its activity and the date on which it ceased operation.

QUESTIONNAIRE

All relevant questions must be answered with clear and correct figures. Estimates will be accepted where actual data are not available. Values, **excluding VAT**, are to be expressed in Fiji Dollars.

1.	Orgai	nisatio	nal S	tructu	ıre
----	-------	---------	-------	--------	-----

Does this business operate at mor	e than one location?		
Please tick the appropriate box:	No Yes If	yes, please give details be	elow:

Please tick appropriate box	Yes	No
Does the establishment import or export any type of goods or services		
If yes, please specify		

5. Form of Ownership

Please	Please tick appropriate box										
003	Fiji owned	1		Branch of an overseas company	2						
	Subsidiary of an overseas company	3		Others (specify)	4						

6. Equity Participation

Please indicate the equity capital held by Fiji Citizens.	As at end of 2020	%

PRIMARY INCOME EARNED DURING THE ACCOUNTING PERIOD

7 This refers to the value of work completed during the year. Work is regarded complete when it is delivered to the control of the purchaser and final payment including retention fee has been billed.

If your firm is involved in multiple activities such as construction of buildings, roads and bridges etc., state separately the value of work done under each of these activities.

Exclude VAT charged on goods and services provided.

OTHER INCOME

- 19 Include all claims arising from business insurance. Examples of business insurance are insurance against the risk of buildings, properties and stocks. Exclude life, education or any other personal insurance.
- Include all claims received arising from casualty insurance. Examples of casualty insurance are insurance against the risk of accidents and illness etc. to employees. Claims for life, education or any other form of personal insurance are to be excluded.

PURCHASES OF MATERIALS AND OPERATING EXPENDITURE

- 32 State in detail the total value of all purchases of materials and supplies during the year for use in the building and construction work. In arriving at the value, deduct trade discounts received. The cost of transport should be included in question 46 unless it is accounted for as part of the purchase price.
 - Include all purchases of: a] Basic materials and components such as timber, cement, iron and steel etc that are physically incorporated in the building and construction.
 - b] Auxiliary materials such as nails, glue, small tools, parts, materials for repairs and maintenance.
 - c] Materials bought for carrying "own construction" work reported in question 92.

Exclude all purchases of: Machinery and plant and other capital equipment purchased by you which should be included in question 92.

Exclude VAT paid on supplies of goods and services.

FUEL, ELECTRICITY AND WATER

- 34-37 Fuel purchased, other than fuel purchased for resale, including gasoline and other fuel for vehicle etc. should be included.
- 38-39 This should include the cost of electricity purchased for lighting, air conditioning, refrigeration etc and cost of water.

OTHER EXPENDITURE

- 40-42 Repairs and maintenance costs paid to other firms covers the total costs of current repair and maintenance service provided by such firms on repairs done on vehicles, building etc. of the establishment. Current repair and maintenance carried out by an ancillary repair and maintenance unit which has been treated as an independent establishment should be included.
- Cartage and haulage expense includes payment for the transportation of goods and materials within the country. It excludes cost of transport carried out by your own equipment and employees.
- Contract and commission work done by other establishments on your materials covers payments made by the establishment for contract and commission work done on materials controlled by your establishment.
- Include payment in respect of leased/rented land. If it is not possible to separate payments made for land from building, please include expenditure in Question 56.
- Interest payments include interest on long-term debts and interest on any other money the establishment borrowed.

COMPENSATION OF EMPLOYEES

- Gross wages and salaries includes overtime, sick and holiday pay, bonuses, payments under piece rate schemes, all allowances, severance and redundancy pay, sales commissions paid to own employees and directors fee etc.
- Payment in kind is the cost to the employer for providing employees with housing, transport, clothing, food, drinks, fuels, etc. free of charge or at a reduced rate.

STOCKS

- Work-in-progress consists of unfinished output at the end of the reference year.
- 86 Finished goods bought for resale are stocks of goods bought for resale in the same condition as purchased.
- The value of materials, fuel supplies and components are stocks of raw materials not used up in the production process.

LOANS AND ADVANCES

88 Please provide information relating to any loan or advances taken during the period.

NET EARNINGS

This is the net profit of your establishment/enterprise from the profit and loss account.

NUMBER OF EMPLOYMENT

Please note that the information in respect of <u>employment is for the last pay week in June 2020</u> but the rest of the question requires data for the appropriate accounting year.

Expatriates are non-Fiji citizens who stayed in Fiji.

<u>Working proprietors</u> include all individual proprietors and partners who are actively engaged in the work of the establishment. Silent or inactive partners should be excluded unless they participate actively in the work of the establishment.

<u>Unpaid family workers</u> include persons living in the household of any of the proprietors of the owning establishment and working in the establishment without regular pay for at least a third of the normal working hours of the establishment.

ENVIRONMENT RELATED QUESTIONS

In view of the importance of climate change and disaster related events, the FBoS has embarked on compiling Environment Economic Account to be consistent and comparable with other countries. Therefore, the need to capture these statistics from all sectors within the economy, including all business entities. The information provided by the establishment would help us further improve these accounts which would be used in planning and policy formulation.
