Reproduction of Material

Any table or material published in this Report may be reproduced and published without the Fiji Bureau of Statistics' prior approval. However, the source of information should always be identified and acknowledged in all modes of presentation.

PREFACE AND ACKNOWLEDGEMENTS

This report contains statistics on the activities of organizations included in the category of the General Government for the year 2020. The General Government category includes the Central Government, Local Governments and the Statutory Bodies.

Information on the activities of organizations under General Government have been gathered, classified, analyzed and presented in a functional and economic framework following the 2008 United Nations System of National Accounts. The system provides a comprehensive and detailed framework for the systematic and integrated recording of the flows and stocks of an economy.

The important numbers presented are the macro-economic aggregates such as Gross Output, Intermediate Consumption, Compensation of Employees, Consumption of Fixed Capital and Gross Fixed capital Formation. These aggregates are combined with similar information on other industries to provide an estimate of GDP, which is a measure of our economy's size. Information made available in this report will allow us to work out the industry's contribution to the economy. So information contained in this report constitutes inputs to a national accounts system which basically provides a quantitative image of the whole economy.

The Department acknowledges and looks forward to the continued support of the Statutory Bodies, Local Government and various Government departments who provided the information. Their efforts are appreciated.

Maria Musudroka [Ms]

Chief Executive

NOTES TO TABLES

KEY TO ABBREVIATIONS

CFC Consumption of Fixed Capital

COE Compensation of Employees

FNPF Fiji National Provident Fund

GDP Gross Domestic Product

GFCF Gross Fixed Capital Formation

THE INTERPRETATION OF THE SYMBOLS USED THROUGHOUT THIS PUBLICATION ARE AS FOLLOWS:

- - Negligible.
- r Revised.
- \$000 indicates thousands of Fiji dollars e.g. a value given as "5" in the table represents \$5,000.
- Totals are subject to rounding errors.
- VA in the report refers to the Gross Value Added.

1. INTRODUCTION

1.1 History of Studies undertaken

From the inception of this report in 1967, up until 1989 the reports were published under the title "An Economic and Functional Classification of Government Accounts", for years 1990 to 1993 under the title "Fiji's National Accounts Statistics", for years 1994 to 2001 under the title "An Economic and Functional Classification of Public Sector Accounts" and from 2002 to 2012 under the title "An Economic and Functional Classification of General Government Accounts. The studies from 1967 to 2001 were compiled using the 1968 System of National Accounts (SNA) manual and included, other than the functions of the General Government, enterprises owned by them. From 2002 to 2007 the 1993 SNA Manual was used and from 2008 onwards the 2008 SNA Manual has been used.

This report contains the results of the study for the year 2020. It is being published under the title "General Government Accounts" and comprises only the functions of the General Government. Enterprises owned by government with significant revenue falls outside the scope of this report and are covered by the surveys conducted for the business enterprises.

1.2 Need for statistics relating to General Government

Activities of the General Government account for a substantial proportion of the total economic activity, whether in terms of the sector to the Gross Domestic Product (GDP) or in terms of its share of total employment and Gross Fixed Capital Formation (GFCF). Statistics on activities of the General Government are therefore needed for the preparation of national accounts so that a meaningful study of the whole economy can be made.

2. METHODOLOGY

2.1 Legal Basis

The study was conducted under the provisions of the Statistics Act (Cap 71).

2.2 Coverage and Scope

The 2020 study covered the General Government, which consisted of the:

- Central Government, the scope of which extended to government departments, offices and
 other bodies engaged in administration, defence and regulation of the public order,
 promotion of the economic growth and welfare, technological development and provision of
 education, health, cultural, recreational and other social and community services free of
 charge or at sales prices which did not fully cover their costs of production.
- Local Government, the scope of which extended to the administration of their respective municipalities.

• Statutory Boards, the scope of which extended to the administration and regulation of the Government policies.

2.3 Data Collection Procedures

Questionnaires titled 2020 General Government Survey were posted to the Local Government and the Statutory Boards on 01/07/21.

Replies to the questionnaires were required within 30 days from the date of dispatch. Two reminders were issued, separated by two weeks, to those establishments that did not respond within 30 days. Telephone calls and personal visits were made in order to collect the questionnaires from those establishments that did not respond in spite of the two reminders.

Once the questionnaires were received in the office, scrutiny and editing of the data contained in them followed. Errors and omissions if found, called for more correspondence, telephone calls or personal visits in an attempt to obtain complete and correctly filled up returns, which were then placed in files and passed on for data entry. On completion of data entry, tables were run, data edited and analyzed.

Central Government data were extracted from the 'Republic of The Fiji Budget Estimates'.

2.4 Data Processing

Data was processed using Microsoft Excel.

2.5 Reference Period

Reference period is the calendar year 2020.

3. RESULTS

The survey for Local Government and Statutory Bodies for 2020 was exhaustive and had a response rate of 79 percent.

All data contained in this report are in Fiji Dollars and in current prices.

Results of the study comprise two parts:

- Part A contains the General Government Summary, and
- Part B contains the General Government Components.

Part B thus is further divided into three components:

- Part 1 contains data on Central Government
- Part 2 contains data on Local Government, and
- Part 3 contains data on Statutory Authorities.

PART A: GENERAL GOVERNMENT

General Government, as a producer of service, provides but normally does not sell to the community those common services that cannot otherwise be conveniently and economically provided, and administers the state and the economic and social policy of the community. Their activities, therefore, differ substantially in character, cost structure and source of finance from the activities of businesses.

The activities of government services are largely financed by the government itself, and they are consequently considered to be the final consumers of most of the services and goods which they produce.

There is no competitive market price for most government services and by international convention, the gross output of producers of government services is deemed to be equivalent to their cost of producing the service: that is, the sum of the compensation of employees, intermediate consumption and consumption of fixed capital. The value added of these producers consists largely of the compensation of employees and, by definition, no operating surplus or indirect tax is involved.

INCOME AND OUTLAY ACCOUNT

The Income and Outlay Account records income received and disbursements by the general government.

The components of receipts are in the form of taxes on production and imports, withdrawal of entrepreneurial income from quasi-corporations, property income, current taxes on income, compulsory fees, fines and penalties, social security contributions, and current transfers.

The disbursements include final consumption expenditure, subsidies, property income, social security benefits, social assistance grants, unfunded welfare benefits and current transfers.

The difference between the income received and disbursement is the saving which is recorded as a disbursement item.

Current Transfers to NPISH	4.3 %	3.0 %

CAPITAL FINANCE ACCOUNT

Capital Finance Account records inflows reflecting accumulation and outflows reflecting financing of capital assets undertaken by the general government. It shows the economic significance of capital transactions and, in particular, the gross fixed capital formation (GFCF) which is the basis of the government's development objectives.

The major components of receipts are in the form of loans and savings that has been transferred from the income and outlay account. The major components of disbursements include GFCF, debt redemption and capital transfers.

The difference between the income received and disbursement is the balancing item which is recorded as a receipt.

FINAL CONSUMPTION EXPENDITURE

Final consumption expenditure consists of expenditure, including imputed expenditure, incurred by general government on both individual consumption good and services and collective consumption services. The components of individual consumption goods and services are Health Affairs and Services, Education Affairs and Services, Social Security and Welfare Affairs and Services, and Recreational, Cultural and Religious Affairs and Services. The components of collective consumption services are General Public Services, Defence Affairs and Services, Housing and Community Amenity Affairs and Services, Agriculture, Forestry, Fishing and Hunting Affairs and Services, Mining, Manufacturing and Construction Affairs and Services and Other Economic Affairs and Services.

The major components of final consumption expenditure are the compensation of employees (COE), intermediate consumption (IC) and sales.

Of the total Final Consumption Expenditure:

GROSS FIXED CAPITAL FORMATION

Gross Fixed Capital Formation (GFCF) records purchases of fixed assets and adds to that own-account production of such assets whilst deducts the sales of similar second-hand goods during the period.

GROSS OUTPUT ACCOUNT

Gross Output (GO) is the sum of the Compensation of Employees (COE), Intermediate Consumption (IC) and Consumption of Fixed Capital (CFC).

Table 14

2020	1,726,445	466,899	1,259,546	1,096,469	163,077	-

The total general government GO registered a decline of 11.5 percent in 2020 compared to a growth of 3.1 percent in 2019 whilst IC registered a decline of 25.9 percent in 2020 compared to a growth of 6.2 percent in 2019.

The total general government value added (VA) registered a decline of 4.7 percent in 2020 compared to a growth of 1.7 percent in 2019 whilst COE registered a decline of 4.3 percent in 2020 compared to a growth of 1.3 percent in 2019. The CFC registered a decline of 7.5 percent in 2020 compared to a growth of 4.7 percent in 2019.

FIGURE 5

Macroeconomic aggregates when graphed show VA to be moving in line with the COE. The major component of the VA is the COE. It should however be noted that the VA would have been slightly more, if the Central Government were to report on the CFC.

PART B: GENERAL GOVERNMENT COMPONENTS

a] CENTRAL GOVERNMENT

Central government covers all departments, offices, establishments and other bodies, which are agencies or instruments of the central government. These are listed in Appendix I of this report.

APPENDIX 5

CONCEPTS AND DEFINITIONS

Amenities Balancing Item	 Amenities include: Housing - housing is not directly undertaken by the government. It makes loans and grants available to the Housing Authority which has been included under financial institutions. Community development - community development covers town and country planning and the provision of community facilities. Sanitary services - sanitary services consist of the collection and disposal of garbage and refuse, sewerage, operation of drainage system, street cleaning and other sanitary services. In the strict 2008 SNA concept, the common balancing item is the net
	lending between the receipts and disbursements of the capital account. Net lending is the excess of net acquisitions of financial assets by transactors over their net incurrence of liabilities. This item merely shows the difference between the two capital accounts. Changes in deposits, advances, reserves and working capital etc., are also reflected here but have not been identified separately.
Capital Transfers	Are classified as both receipts and disbursements in the capital finance account and includes: Receipts Residents - shows capital contributions by resident authorities for such development projects as water supplies, sanitation and sewerage schemes Rest of the World - shows various development grants and gifts to Fiji from abroad. The main sources of such funds are Australia, New Zealand, UNDP and European Union. Disbursements - the government makes various capital transfers to other sectors of the economy to aid development objectives. The recipients of such aids are the local authorities, the statutory bodies and schools. Payments of sizeable amounts have been made to the Fiji Development Bank, Fiji Broadcasting Corporation Ltd and Air Pacific Ltd. The other major beneficiaries of such capital transfers are the educational institutions. Capital subscriptions have also been called for since Fiji became a member of some of the financial institutions, like the Asian Development Bank, the International Monetary Fund and the International Bank for Reconstruction and Development.

Change in Stocks	Are classified as disbursements in the capital finance account and includes stocks for items of sale such as stores, toilet sets and building materials in cases where town and city councils - owned buildings are being built.
Compensation of employees	Includes all personal emoluments of established and unestablished staff including overtime, FNPF contributions and allowances.
Compulsory Fees, Fines and Penalties	Are classified as receipts in the income and outlay account and includes payments made by households to public authorities in respect of services they provide. Examples of this are fee for passports, driving tests, dog license, airport duties and court fees in the case of central government and parking fees, fines, garbage and cemetery fees, gate takings from parks and rent from properties in the case of local government.
Consumption of Fixed Capital	Are classified as receipts in the capital finance account and includes in theory the value of current replacement cost of reproducible fixed assets except the roads, dams and other forms of construction, used up during the accounting period as a result of normal wear and tear, obsolescence and the normal rate of accidental damage. Because of practical difficulties, consumption of fixed capital is not however provided for in the cases of assets of government. In these instances it is assumed that outlays on repair and maintenance are sufficient to maintain the assets in their original condition. This category, therefore, includes only those values which appear in the local government and statutory boards accounts and which have been treated as general government in this report.
Current Taxes on Income	Are classified as receipts in the income and outlay account and includes compulsory and unrequited amounts levied by public authorities at regular intervals eg Pay As You Earn (PAYE), estate and gift duties; except social security contributions; on income from employment, property, entrepreneurial ownership, capital gains, pensions and from other sources.
Current Transfers NEC	Are classified as receipts as well as disbursement in the income and outlay account and includes: • Receipts - unrequited current transfers received by the general government. Unrequited current transfers refer to transfers of income which do not involve a quid pro quo and which are not contractual in character. Some transfers are requited (e.g. casualty insurance) and some are unrequited. This category is further subdivided between residents and rest of the world. Current transfers from the rest of the world include recoveries in respect of peacekeeping services in Lebanon and Sinai from the United Nations. It also includes aid-in-kind received from rest of the world. • Disbursement - • Residents - this item is further subdivided into: • Central Government (VAT paid) refers to the amount paid by Government Departments to the Inland

	Revenue Department and grants to city and town councils and rural local authorities. Local authorities provide part of the finance for their own recurrent operations from rates and different types of licences. Sometimes further finance is needed and this is made available by the central government. Statutory boards require additional finance for their recurrent operations. Similar payments are also made to private enterprises as and when the need arises. Others current transfers refer mostly to income tax refunds and rewards. Rest of the World - refers to subscriptions to various international bodies and agencies e.g. International Labor Organizations, United Nations agencies such as the World Health Organization and UNESCO, various commonwealth agencies and others.		
Current Transfers to Private Non Profit Institutions Serving Households	Are classified as disbursements in the income and outlay account and includes grants and gifts in cash or in kind made to private non-profit organizations serving households. These transfers are intended to cover current costs of providing the services to households. Details of these categories can be found in Appendix II. The types of non-profit institutions serving households are sub-divided into education, health, and other. Education includes teacher training and salaries grants and health incorporates grants to church owned hospitals, St Johns and the Red Cross. Others include grants for youth training and culture and sporting grants.		
Debt Redemption	Are classified as disbursements in the capital finance account. When the time comes and the various government loans reach maturity, the government has to find finance to pay its creditors. There are two basic ways by which government is able to pay its creditors. On receiving a loan, government usually sets up what is known generally as a 'sinking fund'. Annual payment from revenue is made into this fund to meet the repayment of loan at maturity. However, sinking funds are usually insufficient to repay the loan outright and further finance is needed and on occasions this is met straight out of general revenue. In the other method, the loan is converted, that is another loan is raised to repay the one reaching maturity.		
Defence Affairs and Services	Includes outlays in connection with activities relating to military defence are included here. Final expenditure includes all expenditure by the Fiji Military Forces. Excluded is expenditure on residential family-type military barracks or houses which have been considered as gross fixed capital formation.		
Other Economic	Includes: General Administration, Regulation and Research includes ministries and central government departments connected with the		

Affairs and Services

- administration of economic services, commercial and labor affairs and the general regulation and registration of business are included under this head. Included are Primary Industries, Employment, Trade and Commerce, Co-operatives, Tourism and Meteorological Services etc.
- Water and Electricity- the expenditure in rural electrification by Public Works Department is included under this category. It excludes the expenditure of the Fiji Electricity Authority which is treated as non-financial institution. Public Works Department Water Supplies is also included under this category from 1985.
- Roads include outlays in respect of roads, bridges and car parks etc. are included here.
- Inland and Coastal Waterways expenditure by the Marine Department is included here. It involves the provision and maintenance of facilities for navigation for inland and coastal waterways; dredging of rivers and canals; operation of light houses and other navigational aids, maintenance and operation of harbor and port facilities.
- Other Economic Services the Supplies Department has been recorded in this head. Adequate operational details of the Supplies Department are not readily available in the government budgets hence it has not been possible to classify this as an industry.

Agriculture, Forestry, Fishing and Hunting Affairs and Services

Includes:

Apart from the administrative section of the Agriculture Department which is included in General Administration, Regulation and Research and the Fiji College of Agriculture which is included in (3.2) - schools and universities, all expenditure on agriculture, forestry and fishing is included here. Included are outlays in respect of extension services, development of forests, livestock, fishing resources and veterinary services, etc.

Mining, Manufacturing and Construction Affairs and Services

Includes:

• includes operations of the Government Printer, Ministry of Lands and Mineral Resources and Energy and selected operation of the Ministry of Infrastructure, Public Works and Maritime are included here. Treatment of Public Works Department, however, needs special clarification. In the government budget, the different functions of the Public Works Department viz., work carried out on buildings, roads, wharves, water supplies etc., of a recurrent nature are classified and include only direct costs, that is wages and salaries, materials and fuels etc. Furthermore, the overhead costs are classified under separate expenditure heads and are not allocated to the function that is appropriate. Consequently some estimation was necessary to establish the different functions of the Public Works Department under the recurrent budget head.

Education Affairs and Services

Has been subdivided into:

- Primary Education Affairs and Services.
- Secondary Education Affairs and Services.
- Tertiary Education Affairs and Services
- Subsidiary services to Education include school hostels, transportation
 of school children and other ancillary services designed to promote and
 facilitate school attendance.
- Education Affairs and Services n.e.c, covers administrative outlays of the Ministry of Education and the Ministry of Youth and Sports. Expenditure on schools and university is the largest item under education.

Final Consumption Expenditure

Are classified as disbursements in the income and outlay account and is equal to the value of goods and services produced by the general government for their own use on current account; that is the value of its gross output less the sum of its sales of services and new goods and the value of their own account capital formation which is not feasible to segregate as an industry. The value of their gross output is equal to the sum of the value of their intermediate consumption of goods and services, compensation of employees and consumption of fixed capital.

The major component of final consumption expenditure is compensation of employees which includes all personal emoluments of established and unestablished staff including overtime, Fiji National Provident Fund (FNPF) contributions and allowances.

The classification of government final consumption expenditure may be divided into two distinct groups. One is the serving of the community as a whole, for example general public services, community development and sanitary services or to provide services to households such as education, health and housing. The other functional category is assisting and regulating economic activity such as agriculture, forestry and fishing, mining, manufacturing and construction, electricity, gas and water and transport and communication.

A functional description of each category of final consumption expenditure is given in Appendix I at the end of this report and provides details of ministries and departments and their respective classifications. Rigid adherence to the SNA classification is constrained by the unavailability of details. Government budgets do not include sufficient details and hence it becomes difficult to abide by the strict definitions of the SNA.

General Public Services

Has been subdivided into:

General Administration and External Affairs.

 General administration includes organs of government, financial affairs and fiscal administration, offices serving the government as a whole, such as planning services, statistical offices and personnel administration; legislative bodies, audit organizations, treasury, office of the budget, internal revenue and customs authorities.

	 External affairs cover expenditure on the formulation and execution of foreign policy and the handling of foreign relations. 			
Gross Fixed Capital Formation	Are classified as disbursements in the capital finance account and includes the purchase of assets, own account construction of fixed assets less the sales of these assets during the accounting period.			
	The types of assets classified conform to the 2008 SNA recommendations. However, certain headings have not been included namely, orchard plantation development, agricultural machinery, and cattle and breeding stocks. There is, perhaps, some minor capital expenditure on these items by the agriculture department, but such classes of capital expenditure are not revealed in the capital budgets of the government.			
	Capital expenditure has been further classified by the function of the government. The functional classification used is the same as the one described in the income and outlay account.			
Health Affairs and Services	Final expenditure is divided into: Hospital Affairs and Services Public Health Affairs and Services Medical Equipment's and Supplies Health Affairs and Services n.e.c			
Intermediate Consumption	Includes accounting and audit, legal and other fee, electricity and water charges and expenditure on postage and telecommunication, office stationery and printing, advertising and promotion, current repairs and maintenance of buildings, transports, machinery and equipment etc., fuel, bank charges etc.			
Loans	Are classified as both receipts and disbursements in the capital finance account and includes:			
	 Receipts - loans drawn by government from both internal and external sources for development purposes such as road and bridge constructions, road upgrading and agricultural development, housing and telecommunications projects. 			
	 Disbursements - from time to time the government gives loans to various local bodies and companies, although the government does not as a general policy undertake the role of financier. In exceptional circumstances of national or social needs, the government does provide loans. 			
Loan Repayments	Are classified as receipts in the capital finance account and includes capital repayments from the loans the government makes to the local authorities, statutory boards and companies. In the 1993 SNA loan repayments and loans in particular are included in net lending (5.7.9). In this report, these sums are not netted out and appear in both the finance of gross accumulation and in gross accumulation.			

Recreational, Cultural and Religious Affairs and Services	Includes recreational and related cultural services such as the provision and upkeep of parks, swimming pools, libraries, museums, etc.
Property Income:	Are classified as receipts as well as disbursements in the income and outlay account and includes: • Interest • Receipts - amount received in respect of loans made available to residents. • Disbursement — amount paid in respect of internal and external loans raised by the Government. • Dividends - income received by general government due to its participation in equity shares of corporate enterprises eg from Post Fiji and Amalgamated Telecom Holdings Limited and in respect of Government investments in Airport Fiji Ltd, FINTEL, Air Pacific Ltd, Ports Terminal Ltd, Unit Trust of Fiji, Fiji Reinsurance Corporation Ltd and Fiji Television., and comprises the largest item in property income. • Rent - implies to land rent. • Receipts - two distinct categories of land rent are included in this report: Crown Schedule 'A' land rent and rent collected by the Native Land Trust Board. • Disbursement - amount paid by the local government and the statutory boards.
Social Assistance Grants	Is the balancing item in the income and outlay account after all current receipts and disbursements have been accounted for. It shows the amount from current revenue available to the government for development and financing of capital projects. In the capital finance account it is shown under receipts. Are classified as disbursements in the income and outlay account and includes all cash grants to individuals and households by public authorities with the exception of social security benefits and unfunded employee welfare benefits. Payments to widows, guardians and other family allowances, war pensions, care and protection of children, scholarships and fellowships and other forms of maintenance allowance, etc. are examples.
Social Security Benefits Social Security	Are classified as disbursements in the income and outlay account and includes payments made to individuals under the social security schemes, usually out of a special fund such as the Government Employees Provident Fund and the travel and subsistence allowances and medical costs paid to students of the Fiji College of Agriculture. Are classified as receipts in the income and outlay account and includes
Contributions	contributions on the account of employees, whether made by themselves

Social Security and Welfare Services	or their employers to the social security arrangements. These arrangements are schemes imposed, controlled or financed by public authorities for purposes of providing social security benefits for the community or large sections of it. Two main security arrangements can be distinguished in Fiji. One is the pension scheme of the central government and the other is the Fiji National Provident Fund. Includes social security and assistance. In the case of the general government in Fiji, the expenditure is incurred only on welfare services, thus the operations of the social welfare department is included. The Social Security Scheme is operated by the FNPF.	
Subsidies	Are current unrequited payments that government units, including non-resident government units, make to enterprises on the basis of the levels of their production activities or the quantities or values of the goods or services that they produce, sell or import and subsidies are not payable to final consumers It also do not include grants that governments may make to enterprises in order to finance their capital formation. Examples of subsidies are freight, fertilizer, weedicide, cocoa subsidies and other such grants to statutory boards or public corporations.	
Taxes on production and imports:	 Are classified as receipts in the income and outlay account and includes: Taxes on products payable on goods and services when they are produced, delivered, sold, transferred or otherwise disposed of by their producers. Examples of taxes on products used in this report are import, export, and excise duties and value added tax (VAT) which was introduced on July 1 1992 (Decree No. 45). Other Taxes on Production consist of all taxes except taxes on products that enterprises incur as a result of engaging in production. Examples of other taxes on production in the report are stamp duties, business licenses and rates. 	
Unfunded Employee Welfare Benefits	Are classified as disbursements in the income and outlay account and includes payments such as pensions paid to retired civil servants, governor general and ex-parliamentarians, family allowances, worker's compensation, police welfare grants, gratuities to prison and contract officers and cost of living allowance to pensioners which are made by employers without having established special funds or reserves.	
Withdrawals from Entrepreneurial Income of Quasi Government Corporations	Are classified as receipts in the income and outlay account and includes actual payments made out of the operating and property income of quasi-corporations to the central government. Included here are payments made by the Reserve Bank of Fiji.
