FOREWORD

The **2020 Foreign Trade Statistics of the Philippines** is an annual publication of the Philippine Statistics Authority (PSA) that presents information on the value and quantity of Philippine trade with other countries. It also provides comparative data of the current and previous years, as well as historical data on Philippine foreign trade starting 1890.

This Publication consists of four sections, namely, Section 1 - The Country's Foreign Trade Performance in 2020; Section 2 - Summary Statistical Tables on Foreign Trade; Section 3 - Detailed Statistical Table on Imports; and Section 4 - Detailed Statistical Table on Exports.

The PSA acknowledges with sincere appreciation the cooperation extended by the Bureau of Customs (BOC), Philippine Economic Zone Authority (PEZA), and authorized Value-Added Service Providers (VASPs) of BOC and PEZA. We also express our gratitude to the traders who continue to provide the source documents and reports needed in compiling foreign trade statistics.

EXPLANATORY TEXT

Introduction

The Philippine Statistics Authority (PSA) serves as the central statistical authority of the Philippine government on primary data collection. The PSA prepares and conducts periodic censuses on population, housing, agriculture, fisheries, business, industry, and other sectors of the economy.

The generation of International Merchandise Trade statistics (IMTS) or commonly known as Foreign Trade Statistics (FTS) is one of the statistical products generated by the PSA. The FTS is generated from administrative records provided by Bureau of Custom (BOC).

Data on FTS include export, import, total trade, and balance of trade. They are compiled to serve the needs of many users, including the government; business community; compilers of other economic statistics such as balance of payments and national accounts; various regional, supranational, and international organizations; researchers; and the public in general.

Brief Historical Background of FTS

The Central Bank of the Philippines (now known as Bangko Sentral ng Pilipinas) previously compiled and released foreign trade data. Starting 1973, the former National Statistics Office (NSO), now PSA, was mandated to compile foreign trade statistics.

Trade System

The Philippines adopts the "**General**" trade system of recording foreign trade statistics. The customs frontier (not the national boundary) is used as the statistical frontier. Under this system, all goods entering in any of the seaports or airports of the Philippines, properly cleared through customs, are considered **imports**, whether the goods are for direct consumption, for merchandising, for warehousing or for further processing. On the other hand, all goods leaving the country, which are properly cleared through the customs, are considered **exports**.

A distinction, however, is made between export for goods grown, mined, or manufactured in the Philippines (**domestic exports**) and exports of imported goods that do not undergo physical and/or chemical transformation in the Philippines (**re-exports**).

Institutional Arrangement

The PSA renewed the memorandum of agreement (MOA) with the BOC based from the old MOA from the former NSO. A MOA on the electronic exchange of information with BOC was signed on 27 August 2015.

The MOA contains the following terms and conditions:

- a. The BOC shall furnish the PSA electronic copies of the customs import and export entries also known as the Single Administrative Document (SAD) consisting of the data fields of such entries as shown in Appendix 3 in lieu of the printed and pre-numbered Import Entry and Internal Revenue Declaration (IEIRD or BC Form 236) and export declarations; and
- b. The BOC shall submit online, through the Management Information System Technical Group (MISTG), the weekly, monthly, and annual consolidated import and export reports to PSA.

Coverage

The foreign trade data contained in this report relates to the international commerce between the Philippines and other countries by sea and air, whether for private or government use, or for commercial purposes, gifts, or samples.

However, the following classes of goods are **excluded** in the compilation of foreign trade statistics:

- a. Goods simply being transported through a country, includes goods under “in transit” or “in transshipment” customs procedures;
- b. Goods temporarily admitted or dispatched;
- c. Monetary gold;
- d. Issued banknotes and securities and coins in circulation;
- e. Goods consigned to and from the territorial enclaves;
- f. Goods under merchanting;
- g. Goods under operating lease, e.g. exposed cinematographic films imported or exported on rental basis;
- h. Goods lost or destroyed after ownership has been acquired by the importer;
- i. Goods functioning as means of transport;
- j. Content delivered electronically;
- k. Goods for repair or maintenance;
- l. Waste and scrap having no commercial value;
- m. Goods entering or leaving the economic territory of a country illegally;
- n. Goods treated as part of trade in services, e.g. personal effects of passenger on which no duty was paid and goods imported and exported by, or on behalf of diplomatic services;
- o. Fish and other marine products landed by Philippine vessel direct from the sea;
- p. Stores and fuels purchased abroad by ships and aircrafts of Philippine registry;

- q. Goods sent through parcel post; and
- r. Goods with Free on Board (FOB) value less than 25 US Dollar.

Sources of Information

Export and import trade statistics are compiled by the PSA from export and import documents submitted to the Bureau of Customs (BOC) by exporters and importers or their authorized representatives as required by law.

The following are the documents collected, either in electronic or hard copies:

- a) Hard copies of Export Declaration (ED – Department of Trade and Industry form);
- b) Hard copies of Informal Import Declaration and Entry (BOC Form 177); and
- c) Electronic copies of Single Administrative Documents (SAD) for ED and IEIRD.

The electronic copies of all documents that pass through the online system are provided by BOC to PSA through its authorized Value Added Service Providers (VASPs) and the Philippine Economic Zone Authority (PEZA) on a monthly basis through email and via shared google drive.

Commodity Classification

The 2015 Philippine Standard Commodity Classification (PSCC) version is used in the compilation of foreign trade data starting in 2017. The 2015 PSCC was approved by the PSA Board under Resolution No.15, Series of 2015: "Approving and Adopting the 2015 Philippine Standard Commodity Classification."

The 2015 PSCC is a detailed classification of all commodities on imports and exports being used for tariff and statistical purposes. The 2015 PSCC is an integration of the 2012 ASEAN Harmonized Tariff Nomenclature (AHTN) based on the Harmonized System (HS) issued by the World Customs Organizations (WCO) and the Standard International Trade Commodity (SITC) Revision 4, by the United Nations Statistics Division (UNSD).

Country of Origin

The country of origin of an imported commodity is the country where the commodity is grown, mined, or manufactured. Further processing or material added to it in another country must bring about a material transformation to render such country as the country of origin. The country of origin remains unchanged if the commodity is subjected to mere sorting, grading, cleaning, packaging, or similar processing.

Country of Destination

The country of destination is the country of ultimate or final destination of shipment. It is not necessarily the country where the commodity or shipment is unloaded, as in the case of shipment unloaded from one vessel, but it is destined to a country that is landlocked. In which case, the country of destination is the landlocked country.

Valuation

The FOB is the value of the goods free on board the carrier at the frontier of the exporting country. It includes inland freight, export duty and other expenses. Ocean freight, insurance, and consular fees, however, are excluded. The dollar-peso average exchange rate for the year in review is 49.37 for exports and 49.87 for imports.

In addition, valuation of goods in the Philippine foreign trade statistics is FOB. However, cost-insurance-freight (CIF) valuation could also be determined as data on freight and insurance are available.

Processing

The hardcopies of export and import documents, and electronic data files are manually and machine processed to ensure completeness and quality of the data.

The PSA utilizes a customized FTS system to process both hardcopies and electronic copies of documents. It is an integrated data processing system, which contains different modules to cater various stages of processing.

Manual and machine processing of export and import documents include the following:

a. Data Entry/Coding

This is done to translate selected data items from the hardcopy of documents to its equivalent alphabetic or numeric code in accordance with the reference files used in the FTS system.

b. Validation of Data

This is done to ensure the accuracy of the data. Quality control is assured in all processes. Data validation is run regularly through the FTS system to ensure that data are correct, complete, and consistent based on processing specifications. Monthly data review is also undertaken to ensure the quality of data.

c. Determination and exclusion of duplicate transactions

This process is done to exclude duplicate transactions in the monthly and annual release of FTS. Duplicate transactions are determined based on the following data items, namely: control number, folio number, country code, trader's code, port code, vessels, gross kilos, fob value, commodity description, date of registry, and customs procedure code (CPC).

Annual statistical tables are generated after the completion and finalization of monthly statistical tables.

Revision Procedure

Collected hard copies and electronic datafiles within the monthly cut-off date are processed and included in the monthly preliminary figures.

All documents received after the monthly cut-off date are included in the generation of the revised results. The revised data of the previous month are reported during the release of the preliminary report of the current month. Revisions are made for the previous months until the annual report is released three months after the reference year. These revised monthly data are reflected in the annual publication of the FTS.

Data Dissemination

The monthly preliminary results of export and import statistics are disseminated in the form of press releases 40 days after the reference month. On the other hand, the monthly revised results of export and import statistics are disseminated in the next press release.

The annual export and import trade statistics are disseminated three months after the reference year through Special Release, while the annual publication is disseminated six months after the reference year in the form of an e-book.

Both preliminary and final results are posted at the PSA website (Preliminary Results - <https://psa.gov.ph/statistics/foreign-trade>, Final Results - <https://psa.gov.ph/statistics/annual-foreign-trade>).

Data on FTS can also be requested at PSA through the Trade Statistics Division of the Economic Sector Statistics Service with contact number (02) 8-376-1975 or through email address tsd.staff@psa.gov.ph or info@psa.gov.ph.

Section 1

The Country's Foreign Trade Performance in 2020

FOREIGN TRADE STATISTICS OF THE PHILIPPINES: 2020

Table A. Summary of External Trade Performance
2018, 2019, and 2020

Indicator	2018		2019		2020	
	FOB Value (in USD million)	Year-on- Year Growth (in percent)	FOB Value (in USD million)	Year-on- Year Growth (in percent)	FOB Value (in USD million)	Year-on- Year Growth (in percent)
Total External Trade	182,148.27	10.5	182,520.06	0.2	155,026.06	-15.1
Balance of Trade	-43,533.42	59.0	-40,666.10	-6.6	-24,597.02	-39.5
Exports	69,307.43	0.9	70,926.98	2.3	65,214.52	-8.1
Imports	112,840.85	17.4	111,593.08	-1.1	89,811.54	-19.5

Source: Philippine Statistics Authority

A. TOTAL EXTERNAL TRADE AND BALANCE OF TRADE

1. Total external trade dropped

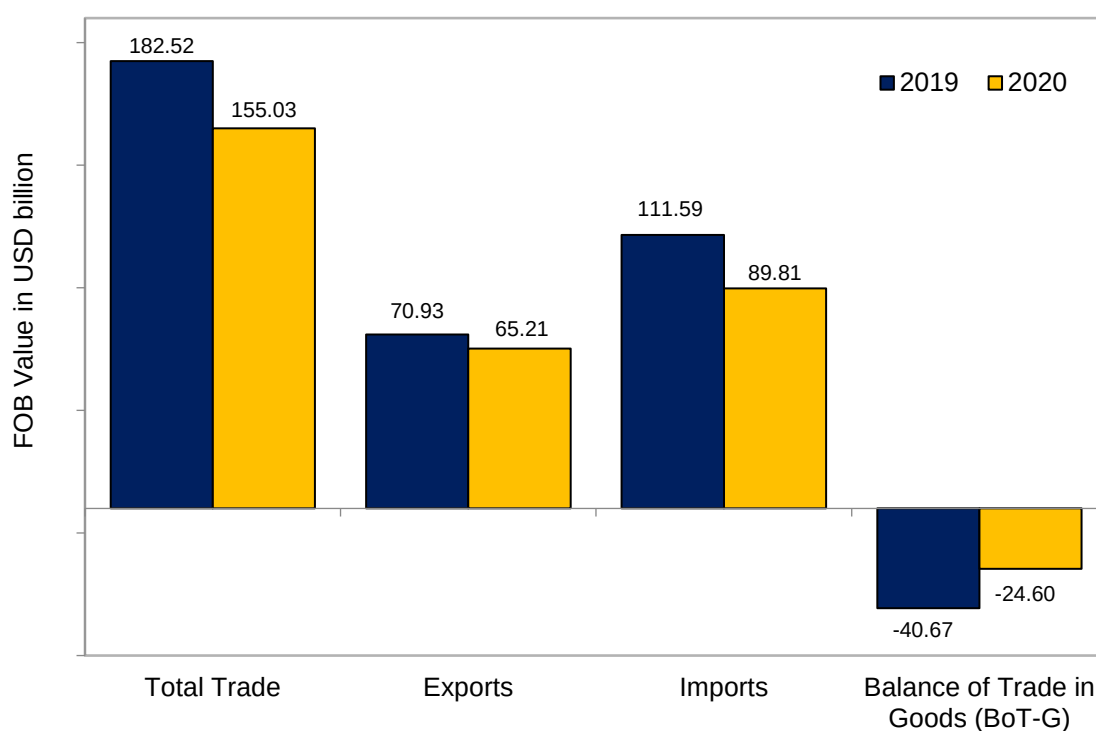

The country's total external trade in goods dropped to USD 155.03 billion in 2020, from USD 182.52 billion in 2019. This indicates an annual decline of -15.1 percent in 2020. In 2019, total trade grew by 0.2 percent, while in 2018, it increased at annual rate of 10.5 percent. (Table A)

Of the total external trade, 57.9 percent were imported goods and the rest were exported goods.

2. Trade deficit declined at a faster rate

Balance of trade in goods (BoT-G) is the difference between the value of export and import. BoT-G in 2020 was USD -24.60 billion which represents a trade deficit with an annual decline of -39.5 percent. The drop in trade deficit during 2020 was faster than its year-on-year decline of -6.6 percent in 2019. On the contrary, trade deficit grew at an annual rate of 59.0 percent in 2018. (Figure 1 and Table A)

Figure 1. Philippine Export and Import Statistics
2019 and 2020

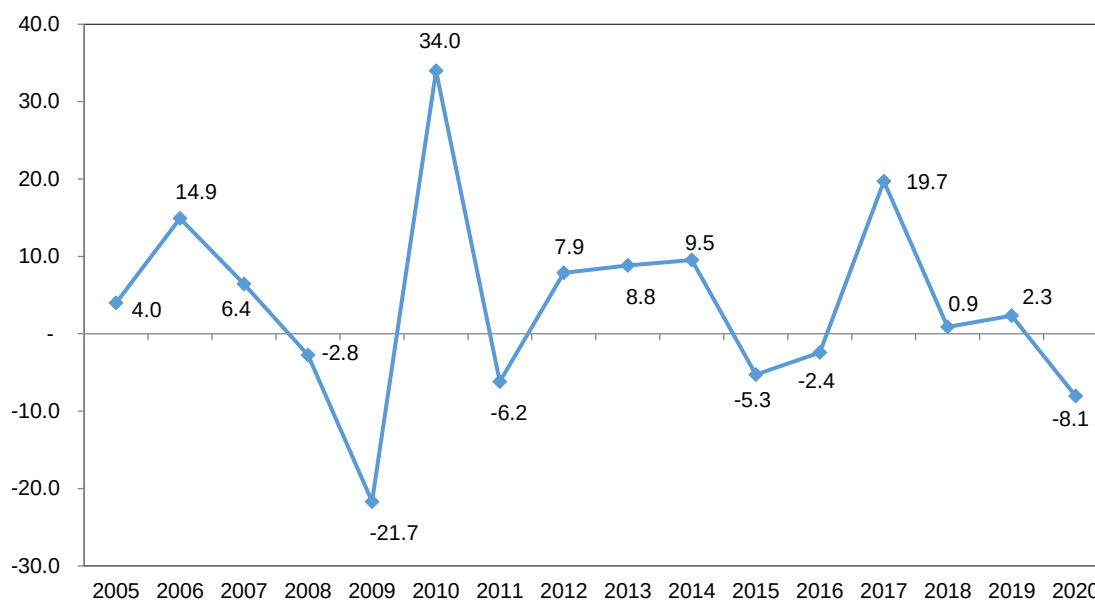

Source: Philippine Statistics Authority

B. EXPORTS

1. Export value posted negative growth

The country's total export sales in 2020, amounting to USD 65.21 billion, decreased at an annual rate of -8.1 percent, from USD 70.93 billion sales in 2019. The annual rate of export earnings climbed to 2.3 percent in 2019 from 0.9 percent increase in 2018. (Figure 2 and Table A)

Figure 2. Year-on-Year Growth Rate (%) of Value of Philippine Exports: 2005 to 2020

Source: Philippine Statistics Authority

Of the top 10 major commodity groups in terms of value of exports, eight recorded annual decreases led by metal components (-18.8%); ignition wiring set and other wiring sets used in vehicles, aircrafts and ships (-18.6%); and machinery and transport equipment (-16.3%). (Tables B and 2)

Table B. Year-on-Year Growth Rate of Value of Philippine Exports for Top Ten Major Commodity Groups: 2020

Major Commodity Group	Annual Growth Rate (%)
Gainers	
1) Other Mineral Products	39.5 ▲
2) Cathodes and Sections of Cathodes, of Refined Copper	14.5 ▲
Losers	
3) Metal Components ^{1/}	-18.8 ▼
4) Ignition Wiring Set and Other Wiring Sets Used in Vehicles, Aircrafts and Ships ^{2/}	-18.6 ▼
5) Machinery and Transport Equipment	-16.3 ▼
6) Bananas (Fresh)	-15.8 ▼
7) Chemicals	-11.8 ▼
8) Other Manufactured Goods	-10.7 ▼
9) Gold ^{3/}	-9.8 ▼
10) Electronic Products	-5.2 ▼

1/ - excluding brakes & servo-brakes

2/ - consists only of electrical wiring harness for motor vehicles

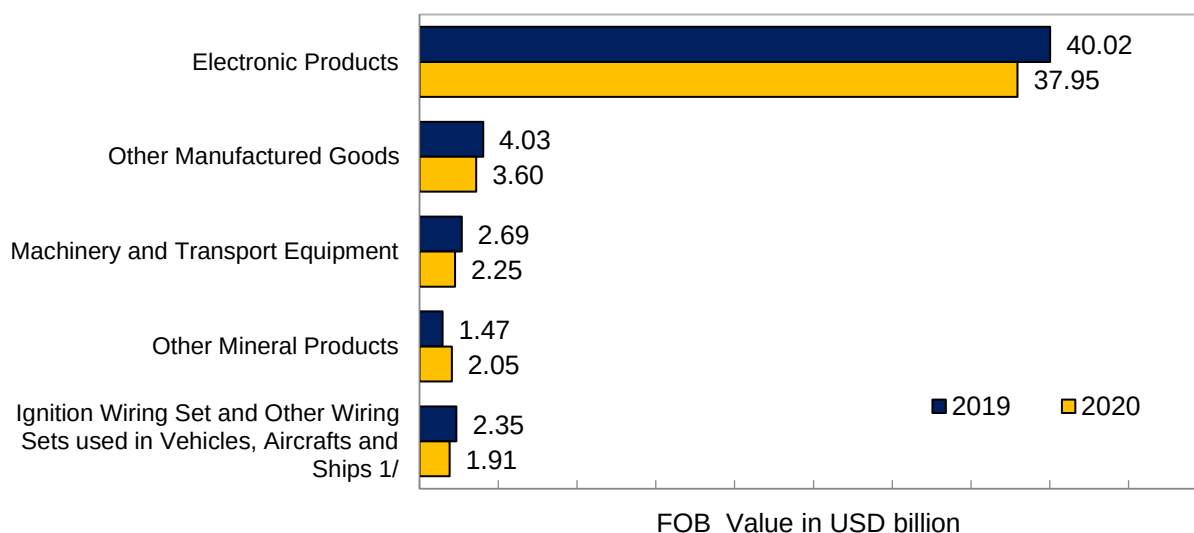

3/ - extracted from copper ores and concentrates

Source: Philippine Statistics Authority

2. Electronic products commodity group remained the highest on export sales

By commodity group, exports of electronic products continued to be the country's top export with total earnings of USD 37.95 billion in 2020. This amount accounted for 58.2 percent of the total exports in 2020. This was followed by other manufactured goods, valued at USD 3.60 billion (5.5%); and machinery and transport equipment which amounted to USD 2.25 billion (3.4%). (Figure 3 and Table 2)

3. Manufactured goods commodity group still comprised the biggest chunk of total exports

By major type of goods, exports of manufactured goods shared the highest to the total exports in 2020 amounting to USD 53.78 billion (82.5%). This was followed by mineral products which contributed USD 5.09 billion (7.8%); and total agro-based products with a share of USD 4.78 billion (7.3%). (Figure 4 and Table 18)

4. Japan contributed the highest export value

By major trading partner, exports to Japan comprised the highest export value amounting to USD 10.03 billion or a share of 15.4 percent to the total exports in 2020.

Completing the top five major export trading partners with their export values and percent shares to the total exports were:

- a. United States of America (USA), USD 10.02 billion (15.4%);
- b. People's Republic of China, USD 9.83 billion (15.1%);
- c. Hong Kong, USD 9.23 billion (14.1%); and
- d. Singapore, USD 3.77 billion (5.8%). (Figure 5 and Table 4)

The top five exported goods to EU member countries with their export receipts and percent shares to the total EU exports were:

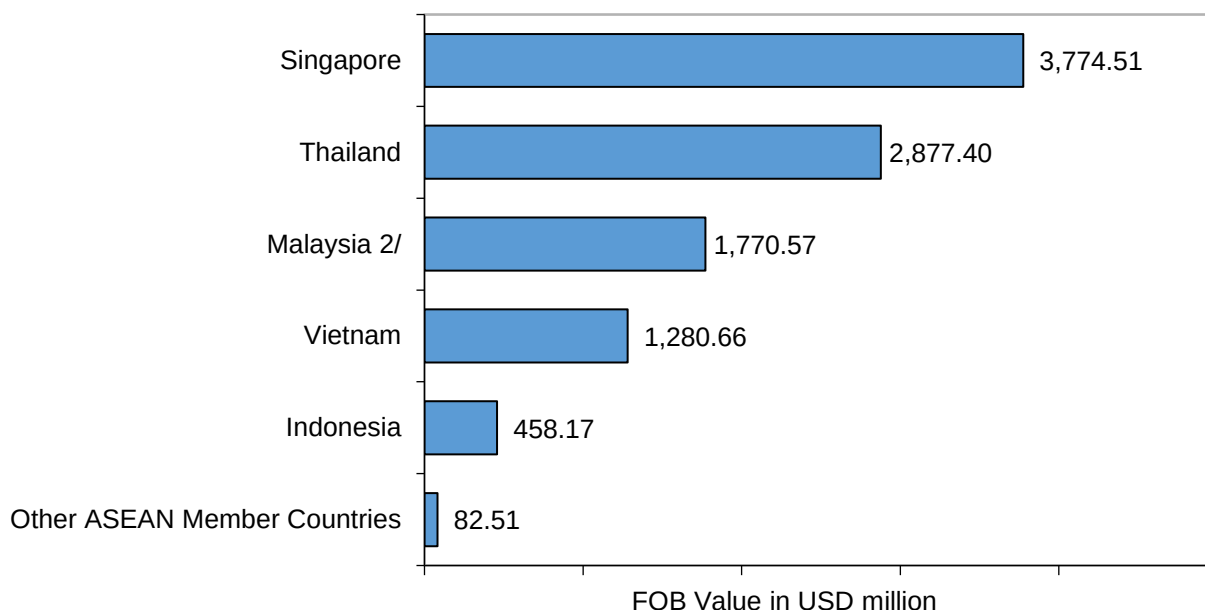

- a. electronic products, USD 4.49 billion (64.6%);
- b. coconut oil, USD 384.95 million (5.5%);
- c. other manufactured goods, USD 318.24 million (4.6%);
- d. tuna, USD 279.64 million (4.0%); and
- e. machinery and transport equipment, USD 256.30 million (3.7%). (Table 8)

6. Singapore led the ASEAN member countries in terms of total exports

Total exports to Association of Southeast Asian Nations (ASEAN) member countries reached USD 10.24 billion or 15.7 percent of the country's total exports in 2020.

Exports to Singapore accounted for the highest share of USD 3.77 billion or 36.8 percent of the total exports to ASEAN member countries. (Figure 7 and Table 7)

The leading export commodities to ASEAN member countries and their corresponding export values and percent shares to the total ASEAN exports were:

- a. electronic products, USD 6.76 billion (66.0%);
- b. other manufactured goods, USD 692.73 million (6.8%);
- c. cathodes and sections of cathodes, of refined copper, USD 461.38 million (4.5%);
- d. metal components, USD 398.05 million (3.9%); and
- e. machinery and transport equipment, USD 288.42 million (2.8%).

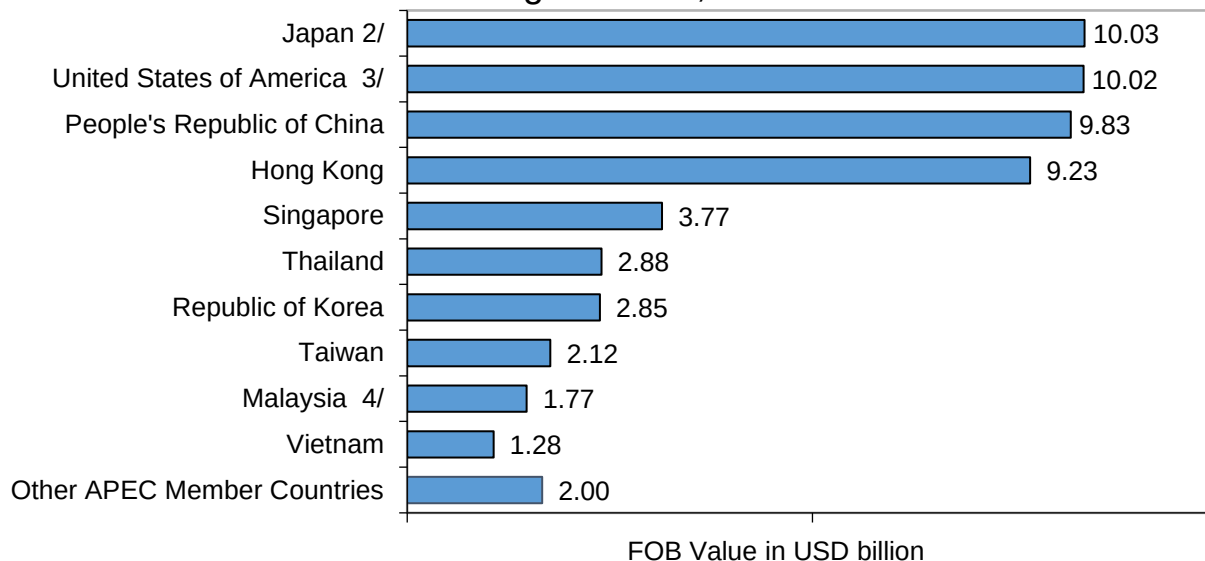

(Table 8)

7. Japan topped exports among APEC member countries

Export receipts to Asia Pacific Economic Cooperation (APEC) member countries amounted to USD 55.79 billion or 85.5 percent of the total exports in 2020.

Export receipts to Japan stood as the highest total export valued at USD 10.03 billion or 18.0 percent of the country's total exports to APEC member countries. (Figure 8 and Table 10)

The top five exported goods to APEC member countries and their corresponding export sales and percent shares to the total APEC exports were:

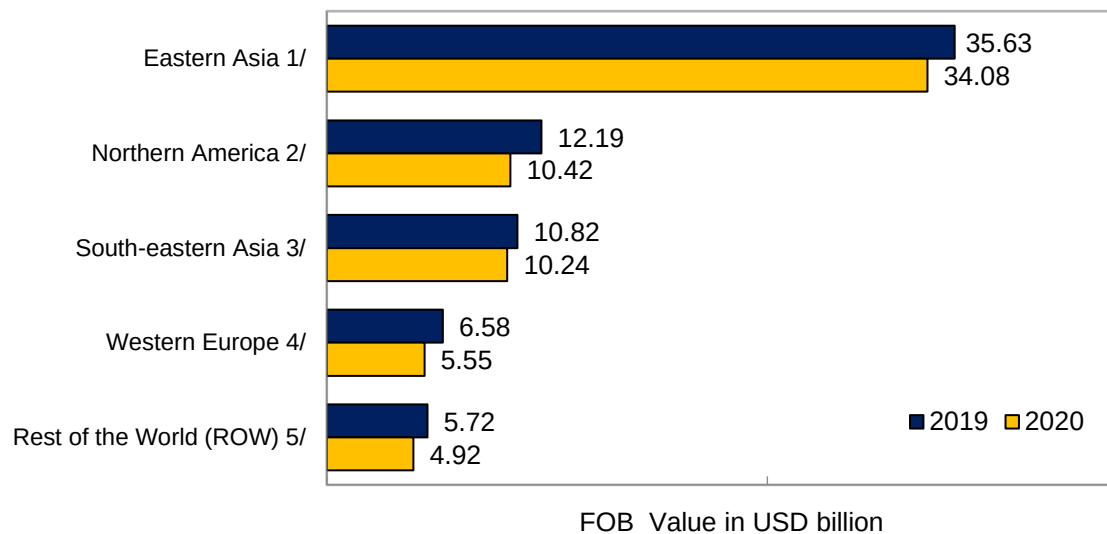

- electronic products, USD 32.90 billion (59.0%);
- other manufactured goods, USD 3.04 billion (5.4%);
- other mineral products, USD 2.00 billion (3.6%);
- machinery and transport equipment, USD 1.93 billion (3.5%); and
- ignition wiring set and other wiring sets used in vehicles, aircrafts and ships, USD 1.85 billion (3.3%).

(Table 11)

8. Eastern Asia contributed the highest export value by geographic region

By geographic region, Eastern Asia comprised the highest export value amounting to USD 34.08 billion in 2020. This was followed by Northern America with an export value of USD 10.42 billion and South-eastern Asia which amounted to USD 10.24 billion. (Figure 9)

C. IMPORTS

1. Import value continued to drop

The total imported goods in 2020, which amounted to USD 89.81 billion, decreased at an annual rate of -19.5 percent. In 2019, the annual decline was recorded at -1.1 percent while in 2018, total import value grew by 17.4 percent. (Figure 10 and Table A)

Figure 10. Year-on-Year Growth Rate (%) of Value of Philippine Imports: 2005 to 2020

Source: Philippine Statistics Authority

The decrement of imported goods in 2020 was due to the decreases in all of the top 10 major commodity groups. The decline in annual rate was fastest in transport equipment (-45.0%); mineral fuels, lubricants and related materials (-42.9%); and industrial machinery and equipment (-26.4%). (Tables C and 3)

Table C. Year-on-Year Growth Rate of Value of Philippine Imports for Top Ten Major Commodity Groups: 2020

Major Commodity Group	Annual Growth Rate (%)
1) Transport Equipment	-45.0 ▼
2) Mineral Fuels, Lubricants and Related Materials	-42.9 ▼
3) Industrial Machinery and Equipment	-26.4 ▼
4) Miscellaneous Manufactured Articles	-23.8 ▼
5) Plastics in Primary and Non-Primary Forms	-17.7 ▼
6) Iron and Steel	-13.8 ▼
7) Cereals and Cereal Preparations	-12.9 ▼

Source: Philippine Statistics Authority

2. Electronic products accounted for the highest import value among commodity groups

Most of the imported goods were electronic products with an import value of USD 26.64 billion or a share of 29.7 percent to the total imports in 2020. This was followed by mineral fuels, lubricants and related materials, valued at USD 7.64 billion (8.5%); and transport equipment which amounted to USD 6.36 billion (7.1%). (Figure 11 and Table 3)

Figure 11. Philippine Imports of Top Five Commodity Groups: 2019 and 2020

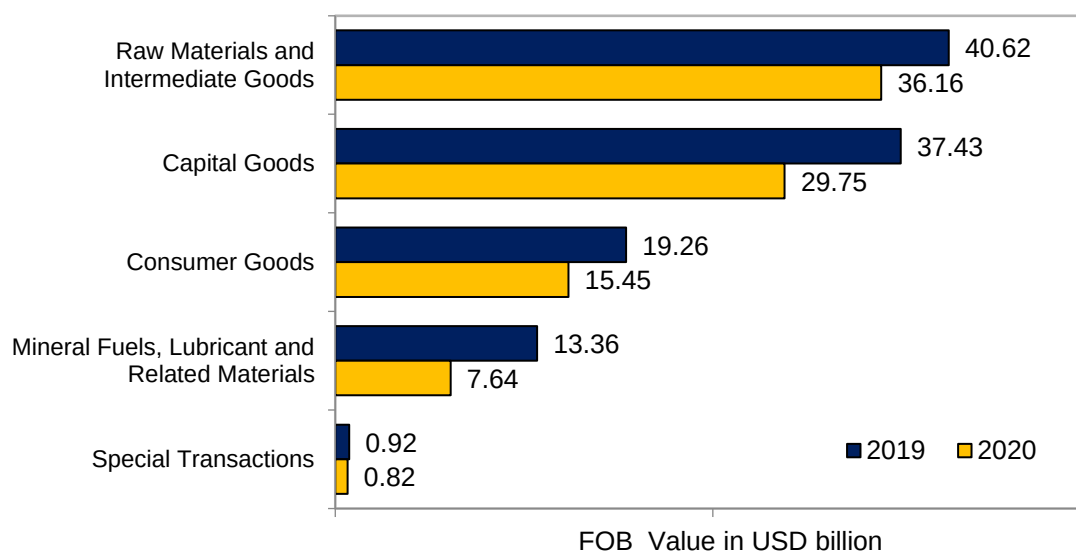

Source: Philippine Statistics Authority

3. Imports of raw materials and intermediate goods contributed the highest

By major type of goods, imports of raw materials and intermediate goods accounted for the largest share of USD 36.16 billion (40.3%) in 2020. Imports of capital goods ranked second with a share USD 29.75 billion (33.1%), followed by consumer goods with USD 15.45 billion (17.2%). (Figure 12 and Table 19)

Figure 12. Philippine Imports by Major Type of Goods
2019 and 2020

Source: Philippine Statistics Authority

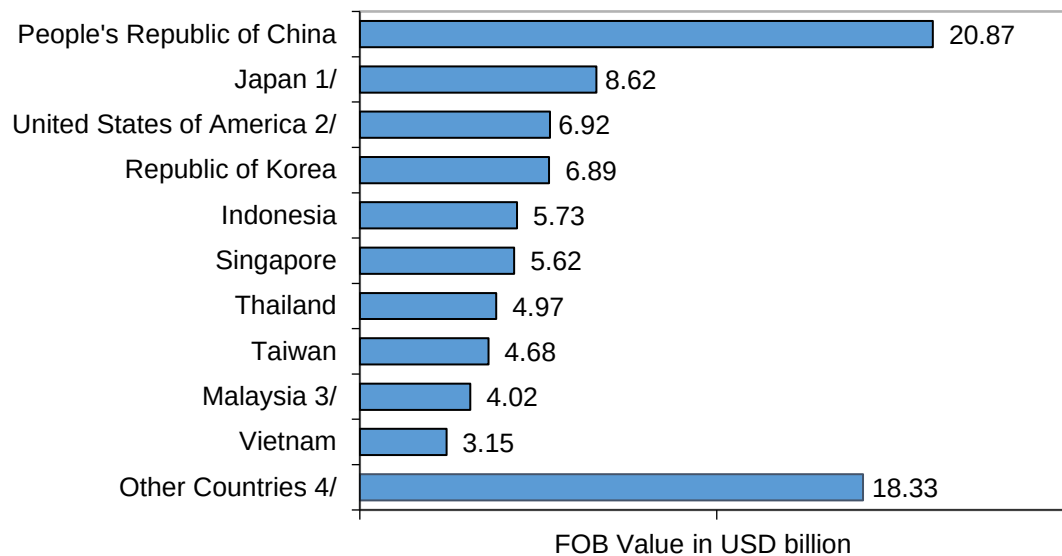

4. People's Republic of China had the highest import value

The People's Republic of China was the country's biggest supplier of imported goods valued at USD 20.87 billion or 23.2 percent of the total imports in 2020.

Completing the top five major import trading partners with their corresponding import payments and percent shares to the total imports were:

- a. Japan, USD 8.62 billion (9.6%);
 - b. USA, USD 6.92 billion (7.7%);
 - c. Republic of Korea, USD 6.89 billion (7.7%); and
 - d. Indonesia, USD 5.73 billion (6.4%).

The leading imported goods from EU member countries and their corresponding import payments and percent shares to total EU imports were:

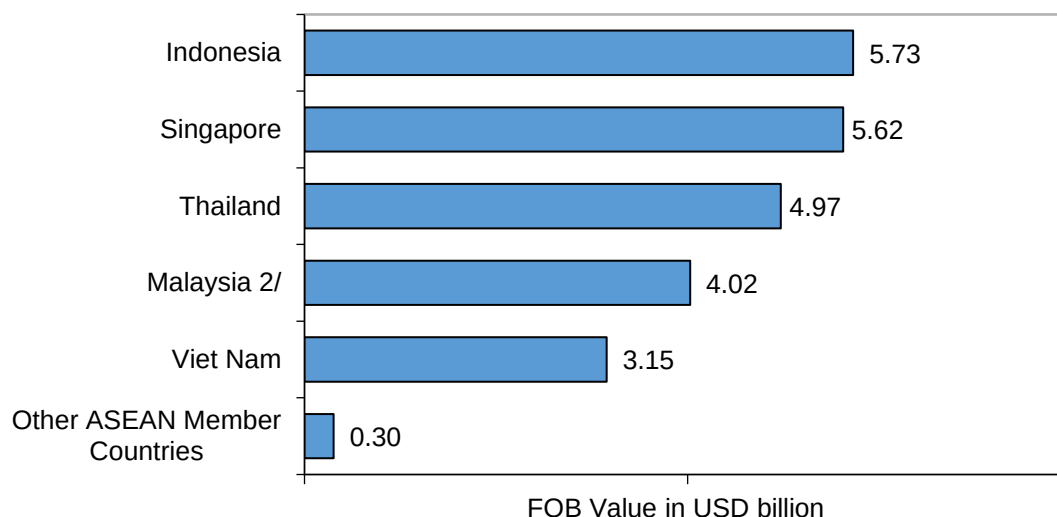

- electronic products, USD 1.35 billion (20.4%);
- medicinal and pharmaceutical products, USD 711.55 million (10.8%);
- transport equipment, USD 655.44 million (9.9%);
- industrial machinery and equipment, USD 609.19 million (9.2%); and
- other food and live animals, USD 445.34 million (6.8%). (Table 9)

6. Indonesia led the ASEAN member countries in terms of imports

The total imports from ASEAN member countries was worth USD 23.81 billion or 26.5 percent of the country's total imports in 2020.

Majority of the imports came from Indonesia which amounted to USD 5.73 billion or 24.1 percent of the total imports from ASEAN member countries. (Figure 15 and Table 7)

The top five imported goods from ASEAN member countries and their corresponding import payments and percent shares to total ASEAN imports were:

- electronic products, USD 4.81 billion (20.2%);
 - transport equipment, USD 3.32 billion (13.9%);
 - mineral fuels, lubricants and related materials, USD 3.03 billion (12.7%);
 - other food and live animals, USD 1.59 billion (6.7%); and
 - cereals and cereal preparations, USD 1.09 billion (4.6%).
- (Table 9)

7. People's Republic of China topped total imports from APEC member countries

Import payments from APEC member countries summed up to USD 77.33 billion or 86.1 percent of the total import. People's Republic of China registered the highest import value among APEC member countries which amounted to USD 20.87 billion or 27.0 percent of the country's total imports from APEC member countries. The top five imported goods from APEC member countries and their corresponding import payments and percent shares to total APEC imports were:

- electronic products, USD 25.04 billion (32.4%);
- mineral fuels, lubricants, and related materials, USD 5.91 billion (7.6%);
- transport equipment, USD 5.49 billion (7.1%);
- industrial machinery and equipment, USD 4.09 billion (5.3%); and
- iron and steel, USD 3.40 billion (4.4%). (Table 12)

8. Eastern Asia contributed the highest import value by geographic region

By geographic region, USD 43.86 billion of the country's imports in 2020 went to Eastern Asia. This was followed by South-eastern Asia, with an import value of USD 23.81 billion, and Northern America which valued at USD 7.45 billion. (Figure 17)

1/ - Sum of domestic exports and re-exports.

a/ - No figures available for 1895. However, figures for 1894 were close to those of 1895.

b/ - Japanese occupation.

c/ - Includes late entries submitted to Customs in 1972 by Elizalde Steel Rolling Mills, Inc. aggregating \$34,944,351

(1968 \$1,907,807; 1969 \$7,965,874; 1970 \$12,558,442; 1971 \$12,512,228); by Calinog-Lambunao Sugar Mill Integrated Farming, Inc.

aggregating \$9,399,699 (1969 \$8,737,599; 1970 \$220,129; 1971 \$441,971); and by Decongcogon Sugar and Rico Milling Co., Inc.

aggregating \$393,069 (1970 \$300,506; 1971 \$92,563)

1/ - Sum of domestic exports and re-exports

2/ - See list of member countries (page xiii)

3/ - Prior to 1994 data, it was named General Agreement on Tariffs and Trade (GATT)

4/ - Excludes associate members

5/ - Prior to 1996 it was named European Community; 1997 onward, it was named European Union (EU); and starting July 2013, Croatia was added as new member of EU
