EGG FREEZING, FERTILITY AND REPRODUCTIVE CHOICE

Emerald Studies in Reproduction, Culture and Society

Series Editors: **Petra Nordqvist**

Manchester University, UK

Nicky Hudson

De Montfort University, UK

This book series brings together scholars from across the social sciences and humanities who are working in the broad field of human reproduction. Reproduction is a growing field of interest in the UK and internationally, and this series publishes work from across the lifecycle of reproduction addressing issues such as conception, contraception, abortion, pregnancy, birth, infertility, pre and postnatal care, pre-natal screen and testing, IVF, prenatal genetic diagnosis, mitochondrial donation, surrogacy, adoption, reproductive donation, family-making and more. Books in this series will focus on the social, cultural, material, legal, historical and political aspects of human reproduction, encouraging work from early career researchers as well as established scholars. The series includes monographs, edited collections and shortform books (between 20,000–50,000 words). Contributors use the latest conceptual, methodological and theoretical developments to enhance and develop current thinking about human reproduction and its significance for understanding wider social practices and processes.

Further titles in this series

Rune Klingenberg Hansen, Thomas Søbirk Petersen, Stine Willum Adrian, Janne Rothmar Herrmann, Anna Sofie Bach, Michael Nebeling Petersen, and Charlotte Kroløkke, *The Cryopolitics of Reproduction on Ice*

Pam Lowe, Sarah-Jane Page, *Anti-Abortion Activism in the UK: Understanding Religion, Gender and Reproductive Rights in the Public Sphere*

Christina Weis, *Commercial Surrogacy and Migration in Russia*

EGG FREEZING, FERTILITY AND REPRODUCTIVE CHOICE: NEGOTIATING RESPONSIBILITY, HOPE AND MODERN MOTHERHOOD

Contents

List of Graphs and Figures	<i>xi</i>
List of Tables	<i>xiii</i>
About the Author	<i>xv</i>
Acknowledgements	<i>xvii</i>
Chapter 1 Introduction	1
1.1. Socio-cultural Context	2
1.2. Age and Fertility	4
1.2.1. Awareness of Age-related Fertility Decline	7
1.3. Cryopreservation of Reproductive Tissue	10
1.4. Describing and Conceptualising ‘Social’ Egg Freezing	11
1.5. Key Issues in Social Egg Freezing	13
1.5.1. Success Rates	14
1.5.2. Access and Cost	18
1.5.3. Risks of Fertility Treatment and Egg Freezing	19
1.6. Overview of the Book	21
Chapter 2 Contemporary Debates in Social Egg Freezing	25
2.1. Medicalisation of Reproductive Ageing	25
2.2. Commercialisation and Exploitation	27
2.3. Company-sponsored Egg Freezing	29
2.4. Extending Fertility and Enhancing Reproductive Choice	33
Chapter 3 Timing Motherhood	37
3.1. The Right Time for Motherhood	38
3.1.1. Living a ‘Life Unexpected’	43
3.2. Perceptions and Representations of Older Motherhood	46
3.3. Problematising the ‘Choice’ to Delay Pregnancy	50

Chapter 4 Performing Parenthood	55
4.1. Intensive Motherhood and Mothering Practices	55
4.1.1. Ambivalence and the Intention to Mother Intensively	57
4.2. Women's Attitudes towards Single Motherhood via Sperm Donation	61
Chapter 5 Motivations for Social Egg Freezing	69
5.1. 'Running Out of Time'	69
5.2. The Lack of a 'Suitable' Partner	72
5.3. Fear of 'Panic Partnering'	74
5.4. Regret and Blame: The Responsible Reproductive Citizen	76
5.5. Social or Medical: Blurred Boundaries	81
5.6. 'Critical Experiences'	82
5.7. Not 'Leaning-in'	83
Chapter 6 The Experience of Freezing Eggs for Social Reasons	87
6.1. 'Choosing' Social Egg Freezing: Ambivalence, Risk and the Chance of 'Success'	88
6.1.1. Ambivalence and Anxiety	88
6.2. Awareness and Understanding of Egg Freezing 'Success Rates'	90
6.3. Cost and Issues of Access	93
6.4. Awareness and Perception of 'Risk'	95
6.5. Experiencing Egg Freezing	98
6.5.1. Physical Effects	98
6.5.2. Emotional Effects	101
6.5.3. 'Going It Alone' and Need for Further Support	105
6.6. Life after Egg Freezing	110
6.6.1. Emotions Following the Procedure	110
6.6.2. Women's Attitudes and Perceptions of Their Frozen Eggs and Future Reproductive Intentions	113
Chapter 7 Negotiating Parenthood: Men, Intimate Relationships and Childbearing	119
7.1. Lost Time and the 'Right' Type of Father	119
7.2. Individualism and the Gendered Pressures of Parenthood	123
7.3. Men as a Drag on Fertility	127
7.4. Negotiating Partnering and Parenthood in the Face of Age-related Fertility Decline	129
7.5. Signalling Fertility: Disclosing Frozen Eggs	132

Chapter 8 Conclusion	139
8.1. Breathing Air Back into the Vacuum of ‘Choice’	139
8.2. New Opportunities, Choices and Responsibilities	144
8.3. Reflecting on Social Egg Freezing and Future Research Directions	147
 Appendix 1: Researching Social Egg Freezing	 151
A.1. Recruitment and Sample	151
A.1.1. Demographic Profile of Research Participants	152
A.2. Characteristics of Egg Freezing Cycles: Findings	153
A.3. Methodological Framework	154
A.4. Ethical Considerations	156
 Appendix 2: Relationship Factors Motivating Use of Egg Freezing	 159
 Appendix 3: Glossary of Terms	 161
 Appendix 4: Abbreviations	 163
 Appendix 5: Research Participants’ Characteristics (Summary Table)	 165
 Appendix 6: Pen Portraits	 169
 References	 179
 Index	 203

List of Graphs and Figures

Chapter 1		
Graph 1.1:	Age-specific Fertility Rates (England and Wales, 1938–2017).	2
Graph 1.2:	Fertility and Miscarriage with Advancing Maternal Age.	5
Figure 1.1:	Average Costs of Elements for a Typical Egg Freezing and Thaw Cycle.	18

List of Tables

Chapter 1

Table 1.1:	Risk of Down’s Syndrome and Chromosomal Abnormalities at Live Birth according to Maternal Age.	6
Table 1.2:	Risks to Mothers in Pregnancy and Childbirth.	6
Table 1.3:	Live Birth Rate Per Treatment Cycle (2014–2016).	7
Table 1.4:	Age at Storage Treatment, Years 2014–2016.	15
Table 1.5:	Likelihood (%) of At Least One Live Birth from Previously Frozen Eggs.	16

Appendix 1

Table A1:	Age at Undergoing First Cycle of Egg Freezing.	152
Table A2:	Participants’ Demographic Information.	153
Table A3:	Number of Cycles of Egg Freezing Attempted by Participants.. . . .	154
Table A4:	Number of Eggs Frozen.. . . .	155

About the Author

Kylie Baldwin is a Senior Lecturer in Medical Sociology at De Montfort University where she is part of the Centre for Reproduction Research. Her research explores the emergence and use of novel technologies concerned with fertility extension, fertility monitoring and genetic conservation, and she has a particular interest in reproductive ageing and older motherhood. She has published her research in journals such as *Sociology of Health and Illness* and *Sociological Research Online* and has contributed extensively to national and international media debate on social egg freezing and has appeared on BBC News, Sky News and Radio Four's *Woman's Hour* and *World at One*.

Acknowledgements

After working on the topic of social egg freezing and allied areas of reproductive choice, timing and control for several years, it has been a privilege to have the time and resources to bring together many years work to produce this research monograph. Even after reading, re-reading and reflecting on the accounts of the 31 women who kindly gave their time to this project seven years ago, I still find their stories, and the data they come together to form, so compelling, and I am only hopeful in producing this book I have done their accounts justice. I had concerns when beginning this project that after writing this book I would have very little more left from my research to say as I expected to exhaust the research findings the hundred or so pages this book generates. However, in revisiting this data with the ‘maturity’ of a few more years of academic experience under my belt, I realise this book could have been written in so many different ways emphasising different findings, theoretical and conceptual lenses and in drawing differently on the participant accounts; such is perhaps the beauty of qualitative research. As such, I hope to spend at least a few more years examining the fascinating topic of social egg freezing and the technologies allied to its practice. I therefore owe a great deal of thanks to the women who shared with me their experiences, who were so candid in discussing such deeply personal, and at times distressing, topics and in lending their stories to form some of the first accounts of social egg freezing that have been shared in the academic community. I also owe a debt of thanks to the Foundation for the Sociology of Health and Illness for funding one glorious year of research-leave as a Mildred Blaxter Postdoc. I am sure without the time and freedoms this fellowship provided, this book would not have been a possibility. Equally I am grateful for the ongoing support of my institution De Montfort University for allowing me the time needed to finalise this monograph after returning full time to my lecturing role in the Leicester School of Allied Health Sciences.

Since beginning my career at De Montfort, I have been privileged to meet so many kind, generous academics who have undoubtedly shaped my identity and experiences as a medical sociologist. Special thanks must go to my incredible mentors and ex PhD supervisors Prof Lorraine Culley, Prof Nicky Hudson and Dr Helene Mitchell who have continued their support and interest in myself and this project long after the completion of my PhD and who continue to shape me as an academic, researcher and as a woman. Equally I am so grateful for the kindness, collegiality and academic inspiration provided by the members of the Centre for Reproduction Research of which I am so proud to be a member. A particular word of thanks goes to colleagues and friends who provided such helpful feedback on earlier drafts of this manuscript, including Cathy Herbrand, Christina Weis and Amanda Wilson. I will also remain indebted, I imagine for some time to come, to Caroline Law and Esmee Hanna who not only provided

constructive comments on drafts but gave so much support, kindness, mentoring and cheerleading from the side-lines, especially when the completion of this project seemed such a distant possibility. There are many other people whose kind words, interest and encouragement over the years have helped form this project into what it is today. This includes members of the British Sociological Association Human Reproduction Study Group and Medical Sociology Group who have listened to me present on this work and provided feedback and discussion as well as other academics and researchers who I have met at other events and gatherings. Finally, I must thank my closest family and friends whose unwavering faith in me helped no end toward the completion of this project. A special word of thanks, of course, goes to my darling husband, Gareth, who so kindly inputted all my references into this book after I neglected to engage with referencing software despite solemnly promising to do after requiring the same of him at the end of my PhD.
